

Developing a Culture of Sustainable Consumption and Lifestyle through Organic Production and Consumption in the State of Rajasthan (ProOrganic-II)

## **Awareness Camps**

## **Synthesis Report**

**Brightest Hope for Positive Change** 

#### **Background and Objectives**

CUTS with the financial assistance from Swedish Society for Nature Conservation (SSNC), Sweden is implementing a four-year project to develop a culture of sustainable consumption and lifestyle through organic production and consumption in the State of Rajasthan (India) covering ten major agriculture-oriented districts by awareness generation, sensitisation, capacity-building, and advocacy activities.

Increased awareness is expected to result in increased consumer demand, which will further move forward the demand for availability and affordability of organic products contributing to decreasing the health hazards of consumers.

The project is expected to result in better-informed consumers and farmers regarding organic consumption and farming and advocating for better policies and enforcement thereof by sensitising policymakers in the State. This will boost organic farming and consumption in the State, and in the long run, will provide a sustainable environment and a better lifestyle.

An awareness campaign has been one of the important activities of the project, which provided a platform to advance the project objectives down the line. These campaigns were conducted in 192 selected villages (*gram panchayats*) of 96 blocks and 10 target districts. In all, two villages were selected from each block of every district, thus totalling to 192.

The objective of organising these awareness camps was to bring forward the whole movement down the line at the grassroots. In a nutshell, the objective of organising these village-level awareness meetings through camps was to educate and sensitise the public about the adverse effects of chemicals and pesticides being used in agriculture and the importance of locally available agriculture-friendly fertilisers and manures, which can be used to reduce the financial burden and hazardous impacts on the environment as well as on human beings.

#### **Activities**

All over Rajasthan, CUTS conducted various awareness camps (around 192) throughout 10 districts in the financial year 2019-20. All camps were organised at the *Gram Panchayat* level wherein vast participation of local farmers and consumers, traders, students, elected representatives, consumers directly linked in agricultural authorities, and related activities was witnessed.

Major stakeholders in the project were representatives from local civil society, consumer organisations and subject experts from government, and farmer clubs also took part and trained the participants on the subject with special focus on women participation.

#### Methodology

The awareness camps were organised at *Gram Panchayat* level with two camps in each block of every district to increase awareness of different organic products among farmers and influence their buying and farming habits beneficial for them.

Street plays, cultural activities, posters, flyers, *chaupal baithaks* (village government meetings), *kathputali* (puppet shows), showcasing of movies on organic farming were organised to educate farmers and consumers.

S. No.	Districts	Camps	Participants	Male	Female

#### Recommendations

- The long cycle of three years for conversion gives goose bumps to farmers
  whose livelihood depends on their land. This is where the first support pillar
  is to be built by providing support in the form of incentives to switch to
  organic farming along with easy availability of inputs, expert training,
  guidance and priority remunerative prices of products out of these fields is
  to be promised.
- For both consumers and farmers, inputs like vermin compost are comparatively expensive and cannot be accessed easily in local markets. Though, subsidies for installing vermin compost machines in fields are available, but for farmers who are not able to invest time in selfmanufacturing of inputs, market availability at reasonable prices shall be insured.
- The government should execute some major policy changes to ensure that organic food is easily available, accessible and affordable.
- New schemes for the benefit of organic farmers should be implemented.
- The government should promote training programmes and provide financial aid for organic farming.
- Organic products should be closely monitored as far as price fixation is concerned.
- Similar awareness programmes should be conducted for the farmer as well as consumers.

#### Outcomes

The activity was conducted at villages (gram panchayats), around 50 participants on and average participated in each camp, which included common consumers, farmers and youth groups, SHGs, local CSOs, consumers, farmers, village level traders, students, elected representative, local officials and experts. The response with regard to participation has been enormous, which proves the growing popularity of the project and the demand of the issue at the grassroots. An enabling environment of sustainable consumption leading to sustainable development was realised, which gave a feeling of an increased area under organic farming both at farm and household level in the state of Rajasthan. The activities at the village level provided a platform to generate awareness among consumers and helped in educating cultivators to use organic fertilisers to grow foods and avoid adulteration so that the people can procure pure and quality food for leading a healthy life. Through this campaign, it was also realised that such efforts would not suffice until and unless these are taken up continuously.

Local media gave wider coverage to all village meetings and local people also participated with great zeal and enthusiasm. Infect, these are the platforms, from where the farmers involved in chemical farming gets motivated to change his/her mode. Documentaries, lectures and short briefings in these grassroots programmes as part of methodology of the programme have really able to leverage the whole mentality of people and have not only generated and enhanced awareness but have helped in generating a team of organic farmers as well. Through this campaign, it was also realised that such efforts should be organised from time to time.

In crux, an enabling environment and established patterns of sustainable consumption leading to sustainable development was realised, which gave a feeling of an increased area under organic farming both at farm and household level in the state of Rajasthan.

#### **General Guidelines**

S. No.	Activity	Remarks
1.	Pre Visit to the Gram Panchayat	There should be at least two pre visits to the gram panchayat to ensure the quality of the event
2.	Time	The time duration for the activity should be at least 2-2.30 Hours
3.	Number of Participants	There should be a minimum of 50-60 participants including 50% women participation
4.	Resource person	There should be a resource person from the concerned department or a subject expert, who can give information about the harmful effects of chemical farming and the benefits of organic farming
5.	Videos/Puppet shows/ Street Plays/Local cultural art form	On organic farming and other issues, such as minimise the use of plastic and other issue related to sustainable consumption
6.	Refreshment to the participants	Refreshments should be provided to all participants

**Note:** The guidelines should be followed in all the GP level activities and review form will be filled by the team according to this agenda.

## **Programme Schedule**

10.30-11.00	Registration		
11.00-11.05	Welcome Address	Project Partner	
11.05-11.20	Opening Remark	Information about the project and title by CUTS team member or project partner	
11.20-11.50	Message Through Cultural Show/Video/ Any other art form	On organic farming and other issues, such as minimised use of plastic and other issue related to sustainable consumption	
11.50-12.30	Address by Subject Expert/Representative of the concerned department	Information about the harmful effects of chemical farming and the benefits of organic farming	
12.30-01.00	Discussions	To be moderated by the project team	
01.00-01.15	General Feedback Session		
01.15-01.20	Vote of Thanks and Way Forward	To the participants and advice to adopt organic farming by CUTS team member/project partner	
01.20	Refreshments & Departure		

**Note:** The schedule can be adjusted according to the suitability of the partner or the area, but the duration of the activity will remain the same.
